## Double stop slip leads

Available in 8mm braid or rope

Our KJK 'Double stop' slip leads are designed to offer a lead that can be adjusted to suit your dog for comfort and security.

Quick and easy to use; one stop prevents the lead from becoming too tight while the other stop prevents the lead sliding off when your dog is by your side and the lead is loose. The Double stop slip lead can also be made into a 'Head collar' lead by pulling a loop through the metal adjuster.

## To turn our 'Double stop' slip lead into a 'Head collar' lead into. To turn your 'Double stop' slip lead into.

To turn your 'Double stop' slip lead into a 'Head collar' lead just pull a loop of braid or rope through the small adjuster to make a two loop lead. Place the larger loop with the leather stop over your dogs head. The loop that was pulled through the adjuster now pulls back over your dogs muzzle/nose. Next just pull back the braid or rope to make the head collar, lining up the metal adjuster so it is centered and comfortable under your dogs chin.

You now have a head collar that works and controls your dog from the back of the neck as a normal slip or clip lead with collar would; but with the 'Head collar' lead your dog will be more responsive to you, responsive to training and will be less likely to pull.

As a 'Head collar' Lead

As a 'Double stop' Slip Lead

Our rope and braid leads are light, strong, durable and washable and made from the highest quality materials in our Devon workshop. KJK Ropeworks design and manufacture rope and braid dog leads, specialist webbing leads and traditional whistle lanyards in cord and leather. Company established by Kevin Keatley in 1983.
